SAVED HIS MONEY AND KEPT HIS EYES WIDE OPEN

ANDREW CARNEGIE
The Man Who Saved

What may be counted Mr. Carnegie's first real investment was in the sleeping car, the model of which was shown him while he was a young man. He made a small investment and reaped a big benefit.

Mr. Carnegie was a rich man before he became interested in steel. He grew rich because he always planned to have a little money put aside when opportunities for investment were offered. How much have you put aside? Nothing? Better get started right now.

Remember, that your savings now means leisure in the future. Get rid of the idea that you have no faculty for saving. Bring a dollar here today and open an account.
